

Demonstration of Proposed Features

Date	07 July 2026
Project Name	CaptionAI: AI Powered Social Media Caption Generator
Maximum Marks	5 Marks

Demonstration of Proposed Features:

The table below lists each feature proposed in the solution and confirms whether it was demonstrated in the final CaptionAI project, along with remarks. Screenshot/evidence links have been left as placeholders for the developer to attach before submission.

S. No	Proposed Feature	Demonstrated (Yes/No)	Screenshot / Evidence Link	Remarks
1	User Registration	Yes	[Add screenshot / evidence link here]	The user can register and proceed to the login page.
2	User Login	Yes	[Add screenshot / evidence link here]	Only authenticated users can access the application.
3	AI Caption Generation	Yes	[Add screenshot / evidence link here]	A relevant and engaging caption is generated using the Groq API.
4	Hashtag Generation	Yes	[Add screenshot / evidence link here]	Relevant hashtags are displayed along with the caption.
5	Call-to-Action (CTA) Suggestions	Yes	[Add screenshot / evidence link here]	Users receive engaging CTA suggestions to encourage audience interaction.
6	Caption History	Yes	[Add screenshot / evidence link here]	Users can view and reuse earlier generated captions.
7	Copy & Download	Yes	[Add screenshot / evidence link here]	The caption is copied to the clipboard or downloaded successfully.
8	Logout	Yes	[Add screenshot / evidence link here]	The application logs out the user securely.

Project Overview

CaptionAI is an AI-powered web application that assists users in creating engaging social media content. The application generates platform-specific captions, relevant hashtags, and call-to-action (CTA) suggestions using the Groq API. It also provides user authentication, caption history management, and download functionality to improve the content creation experience.

Detailed Feature Demonstrations

Feature 1: User Registration

Objective: Allow new users to create an account securely.

Demonstration:

- User enters name, email, and password.
- System validates the input.
- User account is successfully created.
- Registration confirmation is displayed.

Expected Result: The user can register and proceed to the login page.

Feature 2: User Login

Objective: Provide secure authentication for registered users.

Demonstration:

- User enters registered email and password.
- System verifies credentials.
- User is redirected to the dashboard.

Expected Result: Only authenticated users can access the application.

Feature 3: AI Caption Generation

Objective: Generate creative captions using artificial intelligence.

Demonstration:

- User enters a content prompt.
- User selects the desired social media platform.
- User selects a preferred writing tone.
- User clicks Generate Caption.
- The system processes the request using the Groq API.

Expected Result: A relevant and engaging caption is generated.

Feature 4: Hashtag Generation

Objective: Generate suitable hashtags automatically.

Demonstration:

- After caption generation, the system suggests hashtags related to the user's prompt.

Expected Result: Relevant hashtags are displayed along with the caption.

Feature 5: Call-to-Action (CTA) Suggestions

Objective: Generate effective CTA suggestions.

Demonstration:

- The system automatically generates CTA suggestions after the caption is created.

Expected Result: Users receive engaging CTA suggestions to encourage audience interaction.

Feature 6: Caption History

Objective: Store previously generated captions for future reference.

Demonstration:

- Generated captions are automatically saved in the database.
- User opens the History page.
- Previously generated captions are displayed.

Expected Result: Users can view and reuse earlier captions.

Feature 7: Copy & Download

Objective: Allow users to save generated content.

Demonstration:

- User clicks the Copy button to copy the caption.
- User clicks the Download button to save the generated content.

Expected Result: The caption is copied to the clipboard or downloaded successfully.

Feature 8: Logout

Objective: Provide secure session termination.

Demonstration:

- User clicks the Logout button.
- Session is terminated.
- User is redirected to the login page.

Expected Result: The application logs out the user securely.

Test Summary

Total Features Demonstrated: 8

Features Successfully Working:

- User Registration
- User Login
- AI Caption Generation
- Hashtag Generation
- CTA Suggestion Generation
- Caption History
- Copy & Download
- Logout

Overall Result: All proposed features were implemented and demonstrated successfully. The application performed as expected, providing a smooth user experience and generating AI-powered content accurately.
