

Project Demo Planning Template

Date	07 July 2026
Project Name	CaptionAI: AI Powered Social Media Caption Generator
Maximum Marks	1 Mark

Project Demo Planning

This plan outlines the flow of the final CaptionAI demo – the modules/features to be shown, what will be demonstrated for each, who will present it, and the time allotted, so the demo runs smoothly within the available time. As CaptionAI is an individual project, all modules will be demonstrated by the Student Developer.

S. No	Module / Feature to be Demonstrated	What will be Shown	Demonstrated By	Time Allotted (mins)
1	Home Page & Application Launch	Launch the CaptionAI application and open the Home Page.	Self (Student Developer)	1
2	Prompt Input, Platform & Tone Selection	Enter a content prompt (e.g., "Launch of a new organic skincare product"), select the social media platform (Instagram, LinkedIn, Facebook, X), and choose the writing tone (Professional, Casual, Friendly, Motivational, Humorous).	Self (Student Developer)	2
3	AI Caption Generation	Click Generate Caption; the request is sent to the Groq API and a relevant, engaging caption is generated.	Self (Student Developer)	2
4	Hashtag & CTA Suggestion Display	Display the automatically generated hashtags and call-to-action suggestions alongside the caption.	Self (Student Developer)	1
5	Copy & Download Caption	Demonstrate copying the generated caption and downloading it for future use.	Self (Student Developer)	1
6	Caption History	Open the History page to view previously generated captions.	Self (Student Developer)	1
Total Demo Duration				8

Demonstration Objective

To demonstrate the complete functionality of CaptionAI, including AI-powered caption generation, hashtag generation, CTA suggestions, caption history, and download/copy functionality using the Groq API.

Detailed Demonstration Flow

- 1 Launch the CaptionAI application.
- 2 Open the Home Page.

- 3 Enter a content prompt (e.g., "Launch of a new organic skincare product").
- 4 Select the social media platform (Instagram, LinkedIn, Facebook, or X).
- 5 Choose the writing tone (Professional, Casual, Friendly, Motivational, or Humorous).
- 6 Click the Generate Caption button.
- 7 The application sends the request to the Groq API.
- 8 The generated caption, hashtags, and CTA suggestions are displayed.
- 9 Copy or download the generated content.
- 10 Open the History page to view previously generated captions.

Expected Results

- Home page loads successfully.
- Prompt is accepted.
- Platform and tone are processed correctly.
- AI generates relevant captions.
- Appropriate hashtags are displayed.
- CTA suggestions are generated.
- Generated content is saved in History.
- Copy and Download features work correctly.

Resources Required

- Laptop/Desktop
- Python 3.10+
- Flask
- SQLite
- Groq API Key
- Google Chrome
- Internet Connection

Risks During Demonstration

- Slow internet affecting API response.
- Incorrect API key configuration.
- Temporary API service interruption.

Mitigation Plan

- Verify internet connection.
- Test the Groq API before demonstration.
- Keep a backup of the project files.
- Verify all dependencies are installed.

Success Criteria

The demonstration is successful if:

- Captions are generated correctly.
- Hashtags are generated.
- CTA suggestions are displayed.
- History stores generated captions.
- Copy and Download features work properly.
- The application runs without errors.
