

Project Initialization and Planning Phase

Date	7 July 2026
Project Name	CaptionAI: AI Powered Social Media Caption Generator
Team	3 Members

Define Problem Statements

The objective of this activity is to understand the difficulties faced by potential users of the application. The following customer problem statements were prepared after discussing the needs of social media users, content creators and small business owners who regularly struggle with caption writing and content engagement.

PS No.	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A social media user or content creator	Create engaging captions quickly	I struggle to think of creative captions and hashtags.	Writing captions manually takes time and creativity.	Frustrated and less confident about posting regularly.
PS-2	A student or beginner creator	Increase engagement on my posts	I don't know which captions attract more viewers.	I have limited social media marketing experience.	Confused and unsure about my content performance.
PS-3	A small business owner	Generate captions for multiple platforms	Creating unique captions for every post is repetitive.	Different platforms require different tones and styles.	Stressed while managing content consistently.

These problem statements highlight the need for an AI-based solution that can assist users in generating captions and hashtags efficiently, thereby reducing effort and improving social media engagement.
